WHITE PAPER
V0.1

Ai Market Size

Industrial Transformation and Artificial Intelligence Integration: Today, industries are turning to artificial intelligence to increase efficiency and gain a competitive advantage. Our project aims to use blockchain technology, which enables secure data sharing among industries, in an integrated manner with artificial intelligence. This represents a significant transformation in the digitalization and automation processes of industries.

Data Security and Transparency: Our project supports artificial intelligence applications with the transparency and security advantages provided by blockchain. In response to the increasing demand in the market, particularly in sectors such as finance, health, and logistics, it addresses the need for a solution focused on data security and transparency.

Global Growth and Innovation: The combination of artificial intelligence and blockchain technologies triggers innovation on a global scale, enabling the emergence of new business models. Our project offers a unique solution that assesses the growth potential in the global market, enabling companies and industries to gain a competitive advantage.

ARTIFICIAL INTELLIGENCE MARKET SIZE 2021 TO 2030 (US BILLION)

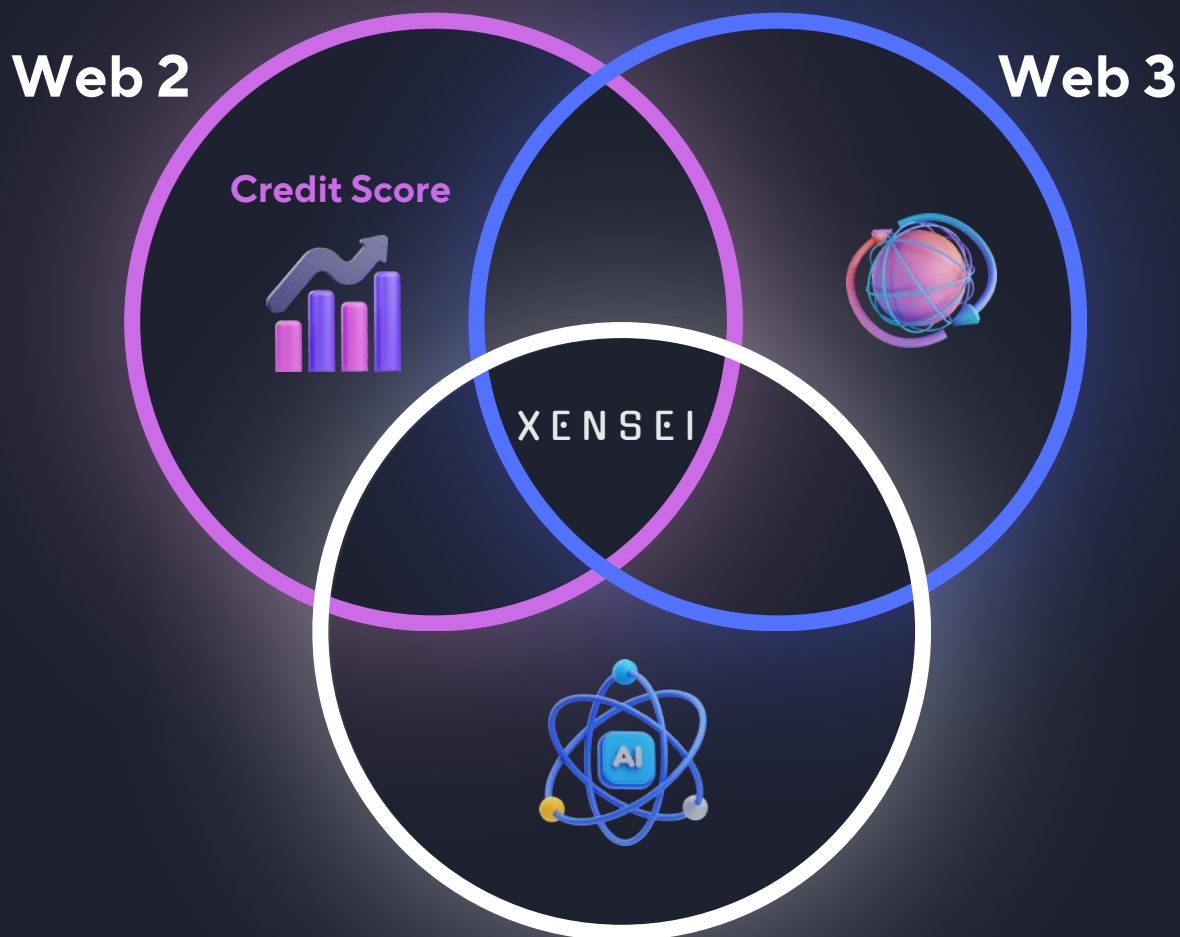

119.7 USD Billion
2022

599.1 USD Billion
2027

What is Xensei?

Xensei is a AI project that moves the credit scoring system from Web 2.0 to Web 3.0, revolutionizing credit evaluation for the future.

What Xensei Offers?

Wallet Analysis

Automating the process of analyzing and tracking crypto wallets, freeing users time to focus on other important tasks.

Data Visualization

Graphing this information and presenting it in a clear and easy-to-understand format using charts and posters

Better Investment Decisions

With access to comprehensive market trends and wallet analysis, users can make more informed investment decisions.

Improved Accuracy

The use of AI technology ensures that the analysis provided is accurate and reliable.

Login Screen

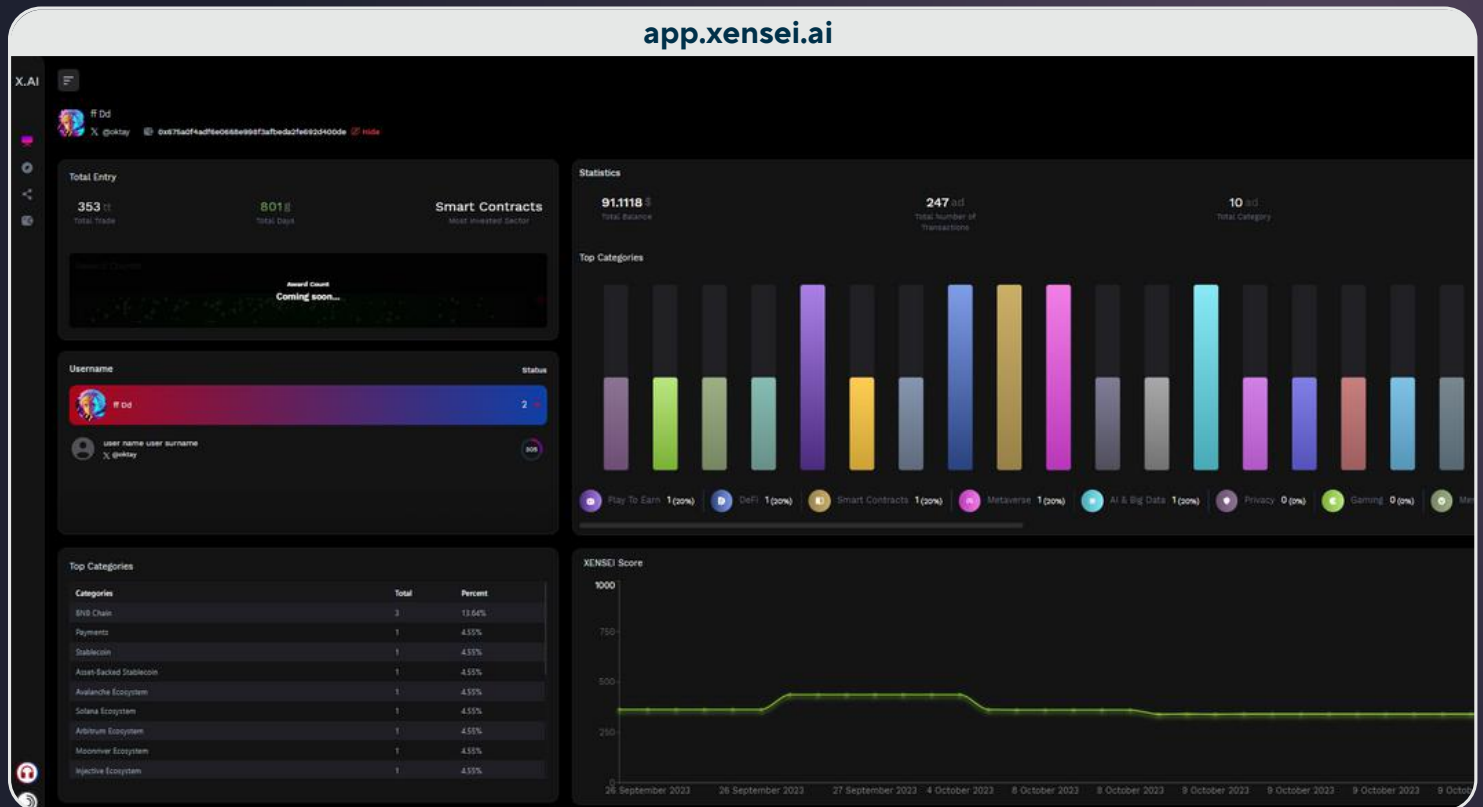

Users can log in to the app by either creating a profile or linking their cryptocurrency wallet.

Xensei is committed to providing comprehensive wallet analysis. However, it's important to note that wallet analysis in centralized exchanges (CEXs) depends on the willingness of the exchanges to provide the necessary API access. If CEXs cooperate, users will gain access to valuable insights for their exchange wallets.

Joining Xensei is possible through two avenues: either by acquiring an NFT ticket or by paying a nominal fee for each analysis. NFT ticket holders gain unrestricted access to analyses, while those without NFT tickets pay a modest fee for each analysis.

Overview Screen

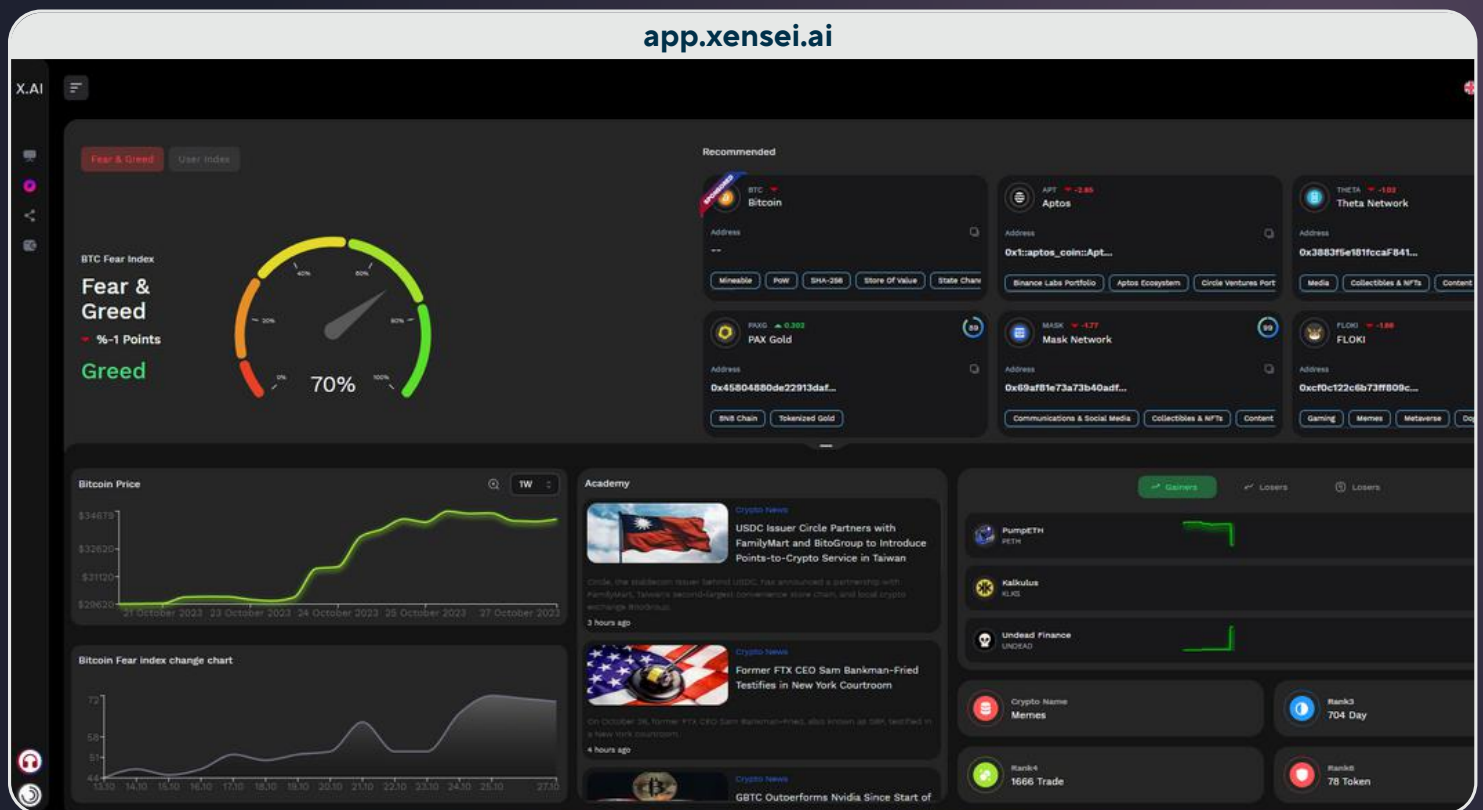

Total entry is used to make strategic decisions, conduct economic analysis or evaluate investment opportunities.

Statistics serve to simplify intricate data, making it accessible and understandable. Within Xensei, users can access investment graphs alongside categories such as Total Balance, Total Number of Transactions, Total Category, and Active Investment.

Xensei Score

The Xensei Score is powered by AI and evaluates factors like wallet potential, trading habits, and transactions to generate a personalized score for each user. This valuable score helps users optimize their strategies and assists businesses in enhancing customer performance. It combines AI and blockchain tech for personalized trading recommendations.

Discover Screen

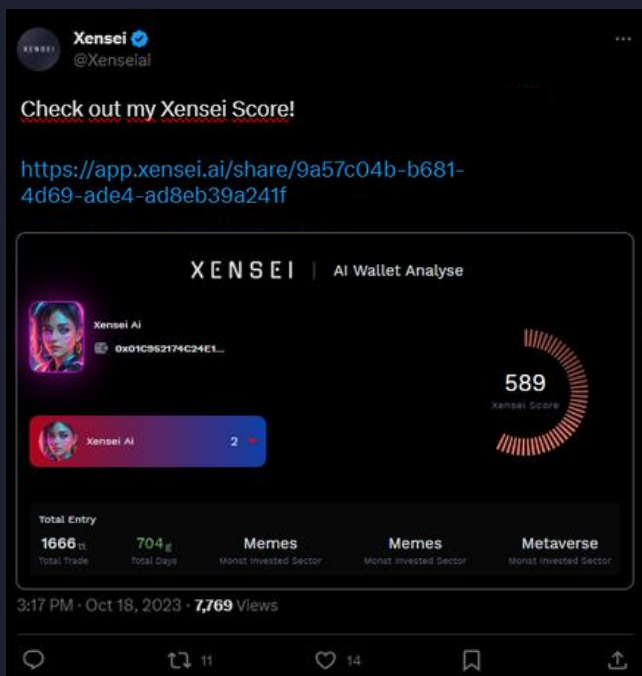

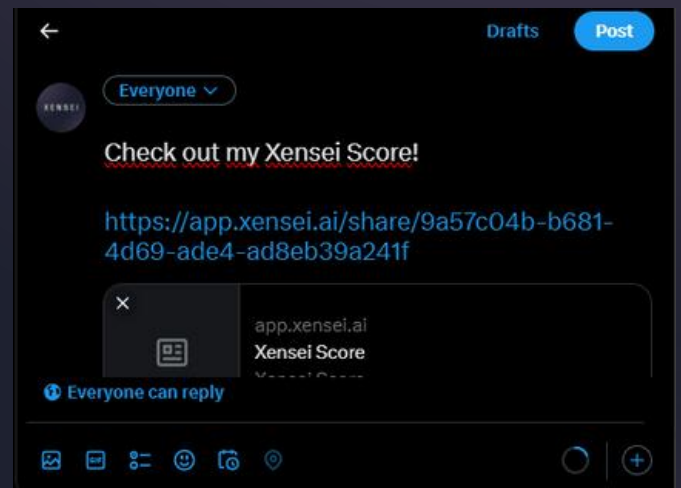

Bitcoin Fear and Greed Index is an index that measures the emotional state of cryptocurrency markets. This index is often used to measure when investors in a market are fearful or overly greedy.

The Recommended section displays tokens with characteristics similar to your current holdings. Our system employs deep learning powered by artificial intelligence. It continuously processes incoming data, expanding its knowledge base. As a result, it suggests tokens with similar potential and higher profits, providing more accurate recommendations with a growing user pool. Our AI self-improves throughout this process.

Xensei is a AI project that moves the credit scoring system from Web 2.0 to Web 3.0, revolutionizing credit evaluation for the future.

Share Screen

With Xensei's share button, it offers users the opportunity to share their Xensei Scores, some crypto wallet data and a personalized AI-generated avatar photo on social media.

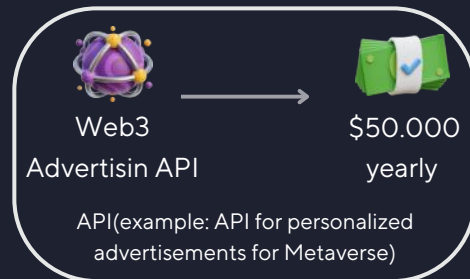

Revenue Model

First Year

B2C

B2B

The revenue from the new developments (like premium NFT that enables more detailed analysis)

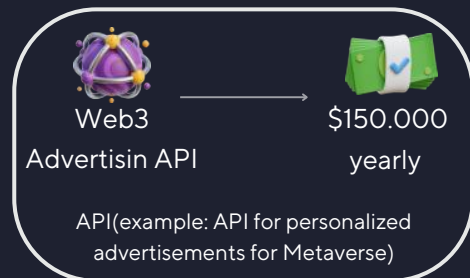

The expected total revenue amount: \$1.400.000

Second Year

B2C

B2B

The revenue from the new developments (like premium NFT that enables more detailed analysis)

The expected total revenue amount: \$4.440.000

Note: The figures represent estimated revenue targets. Xensei does not make any firm commitments.

B2B

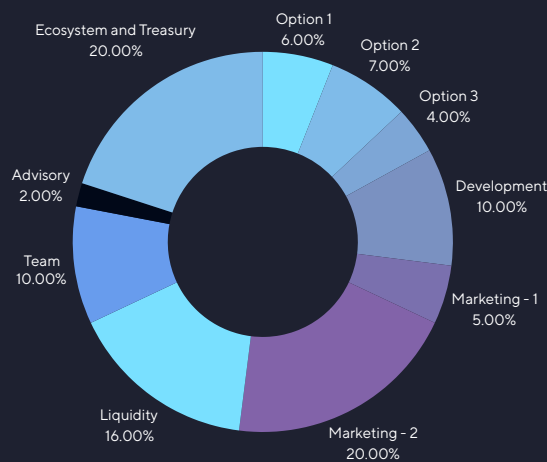

On the B2C side, we collect data on the growing audience and offer their preferences and interests to companies on the B2B side with a 99.99% accuracy rate with AI

Note: The B2B side is planned over an approximate 48-month period. Xensei does not make any firm commitments.

Tokenomics

Allocation	Percent	Total	Notes
Option 1	6.00%	6.000.000	Lock-up Period: 6 Months / Installment Distribution: 6 equal monthly payments
Option 2	7.00%	7.000.000	TGE: 20% Installment Distribution: 4 equal monthly payments
Option 3	4.00%	4.000.000	TGE: 100%
Development	10%	10.000.000	Lock-up Period: 6 Months / Installment Distribution: 44 equal monthly payments
Marketing - 1	5%	5.000.000	TGE: 50% Installment Distribution: 2 equal monthly payments
Marketing - 2	20%	20.000.000	Installment Distribution: 36 equal monthly payments
Liquidity	16%	16.000.000	TGE: 12% Lock-up Period: 12 Months / Installment Distribution: 36 equal monthly payments
Team	10%	10.000.000	Lock-up Period: 12 Months / Installment Distribution: 24 equal monthly payments
Advisor	2%	2.000.000	Lock-up Period: 12 Months / Installment Distribution: 24 equal monthly payments
Ecosystem and Treasury	20%	20.000.000	TGE: 5% Lock-up Period: 12 Months / Installment Distribution: 36 equal monthly payments

TOKEN SUPPORT POLICY

TOKEN UTILITY

Every three months, the revenues generated by Xensei will be used to buy back tokens from the market, and the acquired tokens will be sent to a burn wallet.

50% of the proceeds from NFT sales will be used for buyback and will be sent to the burn wallet.

In the Xensei application, users will be able to utilize the service with more favorable transaction fees using #XSEI tokens.

Note: The tokens specified in the ecosystem and treasury can be used/sold without notice under the necessary conditions determined by the company.

Roadmap

IEO

Publish the Full-APP

LISTING CEX

Integration and B2B Applications.

Development of APIs and adaptation for integration with B2B customers.

Adaptation for businesses to analyze their customers' wallets and offer customized solutions.

Creation of marketing strategies and expansion of user base for the application.

2024
Q1

Creation of marketing strategies for the application and expansion of the user base.

Marketing and Advertising.

2024
Q2

Development of advanced features such as data visualization and statistical analysis.

Integration of machine learning for more accurate analysis and predictions.

Continuous testing and improvement of the product.

2024
Q3

B2B MVP (Minimum Viable Product) Application Launch

Initial testing with a limited group of companies.

2024
Q4

Research and development of AI algorithms for blockchain analysis.

Development of data collection and analysis tools.

Testing and refining the algorithms and tools.

2025
Q1

This document contains general information about the Xensei platform and the services it offers. Xensei is a project that aims for secure data sharing across industries by using blockchain technology and artificial intelligence integration. However, the information presented in this whitepaper should not be considered as investment advice.

Investors are advised to conduct their own research and seek independent financial or legal advice if necessary before making decisions regarding Xensei tokens or any cryptocurrency. The crypto markets can be highly volatile, and a portion or all of the invested capital may be lost. The Xensei project does not provide any guarantees regarding the future value or performance of its tokens.

The Xensei team and its management take great care in ensuring the accuracy and timeliness of the information in this whitepaper; however, changes in market conditions or the project's development process may require updates to this information over time. Xensei reserves the right to change the information in this document at any time without prior notice.

The views and predictions expressed in this whitepaper are based on expectations valid for a specific time frame and carry the risk of not materializing. Therefore, Xensei cannot be held responsible for the outcomes of any investments made based on the information presented in this document.

Xensei tokens are not subject to the securities and capital market regulations of any country. However, investors should carefully examine the legal requirements in their own countries before purchasing Xensei tokens.

Any legal liability or compensation claim should be made to Xensei's registered business address and according to applicable law.

In conclusion, this legal disclaimer should be considered as a general guide regarding the Xensei platform and its tokens. It is strongly recommended that investors conduct a comprehensive evaluation before making any decisions.
